h6 Heading

This file is what a user will see when they select your template. Make sure that you update the fields in the yaml header. In particular you will want to update the `output` field to whatever format your template requires.

This line rendered as italicized text.

This line rendered as bold text.

This line rendered as italicized and bold text.

This line of text will be strikethrough.

You can use the `<u>` tag to underline text.

You can use the `<mark>` tag to highlight text.

This `^text or number^` rendered as superscript.

Example of a paragraph with the `.lead` class applied

Complete quotes including source, open and closing quote symbols.

It is further proof that refugee movements and the broader issue of migration of populations … is a global challenge that cannot be confined to a few countries.

Filippo Grandi Simple quote with no source nor quote symbols.

The situation in South Sudan is far too fragile and dangerous for people to go back.

This is a good place to demonstrate special features that your template provides. Ideally it should knit out-of-the-box, or at least contain clear instructions as to what needs changing.
